

PORTABLE AEROSOL SYSTEM

Liquid and aerosol fogging applications

B&G

FEATURES & BENEFITS

PORTABLE AEROSOL SYSTEM

The B&G ULV Portable Aerosol System is designed for adaptability, giving operators the option to integrate liquid and aerosol products in one application, or make use of each delivery method individually. Integrated pest control requires more than one application method. Get deep wall penetration, along with crack-and-crevice and localized fogging capabilities in one ideal tool.

- Can be adjusted for delivery of a very fine ULV fog to a heavy mist
- 1-gallon tank can be removed from case for cleaning or filling
- Brass and stainless steel gun with choice of 9-inch or 18-inch extension
- 15-foot coiled hose
- Delivers both water- and oil-based formulations with low to moderate viscosity
- Adjustable flow rates: 4-10 oz/min
- At maximum flow rate (gauge 30 PSI), droplet size is 40-50 microns

- Droplet throw 15 feet
- Coverage: 20 sq ft (at 30 PSI)
- Great for all applications from Bed Bugs to Commercial Kitchens to General Pest

VERSADUSTER KIT FOR DUST APPLICATIONS

The VersaDuster Kit is designed to be connected to the VersaFoamer or PAS system to use as a power duster. The VersaDuster Kit is ideal for all dust applications from commercial kitchens to bed bug treatments.

INDUSTRIES

Pest control.

COMPATIBILITY

Oil and water-based formulations.
